An Experimental Study on Surveillance Robot Using Raspberry Pi

Author(s): Soroosh Mahmoodi*, Malala Stembinkosi Shapola, Parisa Hamedia

Recently, robots have been developed to reduce human resources and observation time in a fast, booming, and rapidly growing technology. In this study, a surveillance robot is designed and manufactured to move around a given surrounding, preferably a domestic environment, record video & audio and send the information to the user through a network. The robot is allowed ...
