Myocardial Contrast and Stress Echocardiography: New Frontiers

Published On: March 10, 2017 | Pages: 001 - 010

Author(s): Paulo Magno Martins Dourado* Jeane Mike Tsutsui, Antonio Casella Filho, Larissa de Almeida Dourado, João Paulo de Almeida Dourado, Leonardo Roever and Wilson Mathias Junior

Stress Echocardiography is an established technique used all over the world as a non invasive evaluation of patients with coronary artery disease (CAD) and also an important method to evaluate myocardial viability and the contractile reserve. ...
