Review and Suitability of the Conception of Architectural Design for the Structural Design of Building Covers

Published On: September 16, 2026 | Pages: 014 - 020

Author(s): Jorge Pablo Aguilar Zavaleta*

Background: Architectural and structural design are frequently managed as sequential specialties, even though decisions on geometry, spatial organization, materiality and structural systems are strongly coupled from the earliest project stages.

Objective: This article reviews the suitability of architectural design conception for structural design and proposes an in ...
